OBJECTIVE

Software Developer with hands-on experience in developing and maintaining dynamic web applications for enterprise-level solutions, including shipping-based ERP systems. Proficient in building responsive, scalable, and interactive user interfaces using **Angular, TypeScript, HTML, and CSS**, with a strong understanding of **Object-Oriented Programming (OOP)** . Demonstrated ability to collaborate effectively with cross-functional teams, implement best practices in front-end development, and optimize application performance through debugging and efficient state management. Adept at integrating APIs seamlessly to enhance functionality and improve user experience.

SKILLS

Languages: HTML5 , CSS3, JavaScript (ES6+) , TypeScript
Developer Tools: Visual Studio Code (VS Code), Git, GitHub
Technologies/Frameworks: Angular, Node.js, TypeORM, WebSocket
Tools & Platforms: Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC)

EDUCATION

KIT's Kolhapur Institute Of Technology, Kolhapur (2022-2025)
B. Tech CSE – **CGPA – 8.6**
Sanjay Ghodawat Junior College, Atigre (2020-2021)
12th non-medical – **87%**
Dynamic English medium school, Atpadi (2018-2019)
10th **– 84.4%**

EXPERIENCE

Shipping Based ERP System Company As SDE Intern (Jan 2025-April 2025)

- Developing and maintaining dynamic web applications using Angular, enhancing user experience with responsive and interactive UI components.
- Collaborating with the development team to implement best practices in front-end development, debugging issues, and optimizing application performance

WirtualWay Private Ltd As Angular Developer (May 2025 - Present)

- Working as an Angular Developer on the RivU Application, building interactive and scalable user interfaces using Angular, TypeScript.
- Contributed to feature development, state management, and seamless API integrations to enhance application performance and user experience."

PROJECTS

Online Auction System (https://github.com/nashteshri/OnlineAuctionSystem.git)

Developed a full stack, role-based online auction platform where admins can create and manage auctions and user can place real-time bids. Implemented secure user authentication using JWT with cookie based sessions. Integrated WebSocket for live bidding updates, ensuring instant communication between users. The system includes features like bidding history ,user profiles and dynamic auction timers. Followed layered architecture for scalability and maintainability with robust backend validation using class-validator and TypeORM .

ACHIEVEMENTS

- Memeber of ACSES Coding Club of College.
- VollyBall Team Captain In College.
